The Honolulu Commitment

1. Make choices that reduce waste in order to halt and reverse the occurrence of marine debris.

2. Encourage all citizens, industry and governments to take responsibility for [illegible]

3. Share openly and freely technical, legal, policy, community-based and economic / market-based solutions that will help prevent, reduce and [illegible]

4. Advocate mechanisms that emphasise the prevention or minimisation of [illegible]

5. Facilitate initiatives that turn waste into a resource in an environmentally [illegible]

xä [illegible]

7. Improve global knowledge, understanding and monitoring of the scale, nature, source and impact of marine debris, and raise awareness of its [illegible]

8. Collaborate with global, regional and sub-regional organisations, to enhance the effectiveness of multi-lateral initiatives aimed at preventing, [illegible]

[illegible]

10. Encourage relevant intergovernmental fora, including those at global and regional scales, to express support for the Honolulu Commitment and encourage governments to take action consistent with the objectives and [illegible]

11. Participate in a global network of stakeholders committed to understanding, preventing, reducing and managing marine debris in an [illegible]

12. Contribute to the development and successful implementation of the Honolulu Strategy – a framework for the prevention, reduction and management of marine debris – and its periodic review.
