1. Introduction

1.1 Purpose

This *Field Reference Guide* condenses information contained in the *Comprehensive Plan* to facilitate use during emergency response operations. While the *Comprehensive Plan* serves as a complete reference document for Alabama incident waterway debris response, the *Field Reference Guide* includes the most pertinent information for quick reference in the field and during times of crisis. The *Comprehensive Plan* and subsequent versions will be posted on NOAA’s Marine Debris Division website at <http://marinedebris.noaa.gov/>.

The overall purpose of this planning effort is to improve preparedness for response and recovery operations following an acute waterway debris release incident in coastal Alabama. The *Comprehensive Plan* and complementary *Field Reference Guide* outline existing response structures at the local, state, and federal levels to facilitate a coordinated, well-managed and immediate response to potential waterway debris incidents impacting coastal areas in the State of Alabama.

1.2 Scope of Plan

The plan addresses potential acute waterway debris incidents affecting Alabama’s two coastal counties, Mobile and Baldwin. For purposes of this plan, the term waterway debris (or incident waterway debris) includes any solid material, including vegetative debris and debris contaminated with oil or hazardous material, which enters a waterway following an acute release incident and poses a threat to the natural or man-made environment. This may include shoreline debris and debris in some inland, non-tidal waterways. This plan only specifically addresses “acute” waterway debris incidents, such as disaster debris, and may not apply to chronic waterway debris issues.

2. Agency Roles, Responsibilities, and Capabilities

2.1 Alabama Incident Waterway Debris Response Action Flowchart

2.2 Agency Jurisdiction Map

Alabama Incident Waterway Debris Response Action Flowchart

START →

Acronyms

- ACP – Area Contingency Plan
- ADCNR – AL Department of Conservation and Natural Resources
- ADEM – AL Department of Environmental Management
- AEMA – AL Emergency Management Agency
- EPA – Environmental Protection Agency
- ESF – Emergency Support Function
- EWP – Emergency Watershed Protection Program
- FEMA – Federal Emergency Management Agency
- NCP – National Oil and Hazardous Substance Contingency Plan

- NRC – National Response Center
- NRCS – Natural Resources Conservation Service
- NWR – National Wildlife Refuge
- RP – Responsible Party (Owner, Operator, Lessee)
- USACE – U.S. Army Corps of Engineers
- USCG – U.S. Coast Guard
- USFWS – U.S. Fish and Wildlife Service

Flowchart Key

- Response action for waterway debris that has the potential to release oil or hazardous material
- Response action for waterway debris that is not oil or a hazardous material
- Indicates response may occur under Stafford Act authorities and/or funds

Waterway Debris/Incident Waterway Debris: Any solid material, oil or hazardous material that enters a waterway following an acute release incident and poses a threat to the natural or man-made environment. This may include shoreline debris and debris in some inland, non-tidal waterways.

Eligibility Determination by FEMA: Made on case-by-case discretionary basis in coordination with eligible applicant, State, and other federal agencies. Is removal in the public interest? Does at least one of the following apply? Removal...

- eliminates immediate threat to human lives, public health and safety
- eliminates immediate threat of significant damage to improved public and private property
- ensures economic recovery of the affected areas to the benefit of the community-at-large

Generally, debris that is an obstruction to vessel traffic in a commercial or commonly used waterway is eligible up to mean high tide and to a depth of 2ft below the maximum draft of the largest vessel that used the waterway at low tide prior to the disaster. Shoreline debris is a secondary focus. (See FEMA Recovery Policy 9523.5)

EWP Eligibility Determination by NRCS

- Result of Presidential or NRCS State Conservationist declared disaster
- Waterway debris is not in coastal or tidally-influenced waters
- Waterway debris is result of natural disaster
- Recovery measures are for runoff retardation or erosion prevention
- Waterway debris is a threat to life and/or property
- Event caused a sudden impairment in the watershed
- Imminent threat was created by this event
- Have economic, environmental, and social documentation adequate to warrant removal action
- Proposed removal action is technically viable

Alabama Incident Waterway Debris Response Map

Legend

- County Lines
- State Jurisdictions**
- State of Alabama Seaward Boundary (3 nmi)
- State Owned Submerged Lands
- Mississippi and Florida Jurisdictions
- Federal Jurisdictions**
- Coastal/Inland Zone Boundary (U.S. Coast Guard/EPA boundary for oil or hazardous material response)
- Federally Maintained Waterways and Channels (U.S. Army Corps of Engineers)
- Outer Continental Shelf (OCS)
- U.S. Fish and Wildlife Service National Wildlife Refuge (NWR)

2.3 Agency Response Capabilities

Each agency self-reported capabilities which could be used during waterway debris response in Mobile and Baldwin Counties. Agencies were asked to indicate whether capabilities were in-house or were contracted through a third party. Footnotes refer to additional information provided for a particular capability.

¹ADCNR – Amphibious excavator, Marsh Master

²ADCNR – LG Adams: Weeks Bay Resource Center and Visitors Center/Auditorium. May be limits on internet/Wi-Fi bandwidth.

³ADCNR – Terry Boyd: Boggy Point, Cotton Bayou; Phillip Hinesley: Coastal Section has inventory of public launches in Mobile and Baldwin Counties; LG Adams: Safe Harbor Launch/Weeks Bay Reserve (WBNERR) (limited draft), Baywatch/Fish River Launch (public launch at mouth of Fish River), and Viewpoint Launch (public launch at Big Mouth/Pelican Point)

⁴ADCNR – Terry Boyd: Claude Peteet Mariculture Center; LG Adams: Weeks Bay Resource Center parking area and Safe Harbor at Weeks Bay Reserve

⁵ADCNR – Public launch at mouth of Fish River

⁶ADCNR – Lodging for 8-12 persons at Weeks Bay Reserve Dormitory

⁷ASPA – Have one patrol vessel and one work boat

⁸USACE – has a GIS cadre for response

⁹USACE – has planning response teams

¹⁰USACE – Surveillance drone housed at USACE District, Jacksonville

¹¹USACE – Funding in place for federal projects only

¹²FEMA – Capabilities contingent upon a Presidential major disaster declaration. FEMA capable of mission-assigning other Federal support to increase capabilities. FEMA has interactive live collection and mapping capabilities and a template wet debris collector map for Region IV.

¹³NOAA – Coordinates marine mammal and sea turtle stranding response and reviews proposed debris removal activities for compliance with ESA and Magnuson-Stevens Fisheries Conservation and Management Act

¹⁴NOAA – Funding through grant program and possible Congressional supplemental funding

¹⁵USCG – Has divers but not typically used for waterway debris

¹⁶USCG – Small amounts of boom on hand but capable of using pre-event contracts for larger pollution events

¹⁷USCG – Surveillance drones not typically used for waterway debris

¹⁸USCG – Funding for pollution incidents only

¹⁹USCG – Docks for wet storage of vessels has limited space and suitable for larger vessels only

²⁰USCG – Staging area for dry storage of vessels has limited space

²¹USCG – Pre-event contracts and staged agreements in place for pollution incidents only

²²USCG – Contract authority and oversight capabilities for USCG contracts only

Permitting and Compliance for Waterway Debris Removal in Alabama

- U.S. Army Corps of Engineers (USACE) permit is required for debris removal within waterways and wetlands. One or multiple permits may be needed.
- In Mobile and Baldwin Counties, permit applications are jointly reviewed by USACE and Alabama Department of Environmental Management (ADEM). A "Joint Application and Notification" can be downloaded at the USACE, Mobile District, Regulatory Division webpage.
- It is the responsibility of the **lead Federal agency** to ensure compliance with National Environmental Policy Act (NEPA), federal coastal consistency, and consult with tribal and resource agencies including Alabama Historical Commission (AHC), U.S. Fish and Wildlife Service (USFWS) and NOAA's National Marine Fisheries Service (NMFS).

Compliance Process Under Federally Funded Response

(for example, FEMA funding under Stafford Act declaration)

- The lead federal agency is responsible for NEPA compliance, federal consistency with AL Coastal Area Management Program, and consultations with AHC, USFWS and NMFS.
- FEMA is the lead federal agency when providing funding under Stafford Act declaration.
- Debris removal under Stafford Act declaration is exempt from NEPA review process.

Compliance Process Under State/Local Agency-led Response

- As the lead federal agency, USACE will ensure NEPA compliance, federal consistency with Alabama Coastal Area Management Program, and consult with AHC, USFWS and NMFS

Agency Requirements and Legislation Details

U.S. Army Corps of Engineers (USACE)

Mobile District
Regulatory Division
251-690-2658

- Permit(s) required for debris response/removal work within waterways and wetlands
 - ALG-04 Debris Removal** from waterway for navigational or drainage purposes
 - NWP-3 Maintenance** for removal/maintenance of culverts, sediments or debris accumulated around outfalls, bridges, etc. in wetland areas
 - NWP-22 Removal of Vessels** for removal of wrecked, abandoned, or disabled vessels or other man-made obstructions to navigation
 - NWP-37 Emergency Watershed Protection & Rehabilitation** for work done under NRCS's Emergency Watershed Protection program
 - NWP-38 Cleanup of Hazardous and Toxic Waste** for containment, stabilization, or removal of hazardous or toxic waste materials not under CERCLA/NCP

Alabama
Department of
Environmental
Management
(ADEM)

Coastal Program
251-304-1176
Warning Point
1-800-843-0699
Air Division
334-271-7879

- In Mobile and Baldwin Counties, ADEM Coastal Program simultaneously reviews USACE permit applications and notifies both the applicant and USACE of concerns or requests for additional information.
 - Activities that may impact coastal resources such as wetlands, submersed grassbeds, oyster reefs, and state water bottoms are evaluated.
 - If the project does not fit a nationwide or general permit, a separate determination must be obtained from ADEM with specific conditions.
- Report **oil and/or hazmat spills** to AL Emergency Management Agency State Warning Point
- Call ADEM Air Division for proposed **open debris burning**
- Disposal of hazardous waste must be coordinated with ADEM

Alabama Historical
Commission (AHC)
334-242-3184 x 692

- Consultation with State Historic Preservation Office required if waterway debris response involves Federal permits and/or funding (USACE permit, FEMA funding, etc.) to comply with National Historic Preservation Act
- AHC evaluates whether activities affect historic or cultural sites included in or eligible for the National Register of Historic Places

U.S. Fish and
Wildlife Service
(USFWS)
Alabama Ecological
Services Field Office
251-441-5181

- Consultation required if waterway debris response involves Federal permits and/or funding (USACE permit, FEMA funding, etc.) to comply with:
 - Endangered Species Act (ESA) to ensure actions do not adversely affect listed threatened or endangered species or critical habitat for land and freshwater species and certain marine species such as manatee.
 - Coastal Barrier Resources Act to ensure actions do not encourage development on coastal barriers in Mobile and Baldwin Counties

NOAA National
Marine Fisheries
Service (NMFS)
ESA: 727-824-5312
EFH: 409-766-3699

- Consultation required if waterway debris response involves Federal permits and/or funding (USACE permit, FEMA funding, etc.) to comply with:
 - Endangered Species Act (ESA) to ensure actions do not adversely affect listed threatened or endangered species or critical habitat for marine species.
 - Magnuson-Stevens Fisheries Conservation and Management Act to ensure actions do not adversely affect Essential Fish Habitat (EFH).

National
Environmental Policy
Act (NEPA)

- Requires Federal agencies to follow a specific planning process to ensure environmental consequences of a Federally funded actions are considered
- FEMA is provided with statutory exclusions under the Stafford Act which exempts debris removal from NEPA review when FEMA is providing funding

Rev. 04.2016
